## Fall 2021 Practicum Exam Codes

In an effort to be as transparent as we can be without compromising the integrity of the NCIDQ exam, we have developed this Code document in order for you to know what to expect on exam day. Below is the Table of Contents for the NCIDQ Exam based on the International Building Code (IBC)(2018) and Related Codes that will appear on the Fall 2021 exam. The actual exam document will include the content directly from the IBC for each of the Chapters/Sections identified below (minus any images). The Building Code document will be provided as part of the Case Study for each question. We hope this document will help you narrow down the Code information you should familiarize yourself with for the upcoming exam.

Please note that each Case Study will have a different Code document attached, including only those Codes that are applicable to that Case Study. The Codes identified below are all inclusive, and therefore, applicable to at least one of the three Case Studies that will be on the Fall 2021 exam.
